

ARENA IRRIGATOR

**MORE TIME RIDING
& LESS WATER USED**

The greenPRO GPI-60 solar-powered travelling irrigator for equestrian areas uses a powerful 12-volt motor to rewind the sprinkler. The on-board 22AH AGM solar-charged battery will power the motor for a full 15 hours without needing to be recharged. Thanks to the electric motor, not a single milliliter of water or pound of pressure is wasted in pulling the sprinkler. That means the irrigator can still thoroughly water your arena with pressure as low as 20psi.

The irrigator features a smart electronic system that shuts the sprinkler off automatically based on the precise duration you choose. Anywhere between a quick 22 minute sprinkle and a 2 hour downpour. Watering time isn't dependent on available water pressure. All you have to do is set it and forget it.

You can effortlessly move the GPI-60 Arena Irrigator by hand, or tow it by ATV. And it's lightweight construction, floatation-style tyres, and drag-chain make sure it won't leave any tracks in your arena. That way your horse can safely gallop over consistently even footing.

**THE IRRIGATOR CAN OPERATE ON AS LITTLE AS 20PSI.
SO YOU CAN WATER THE SAME AREA WITH LESS
WATER THAN OTHER IRRIGATORS.**

PROTECTS THE HEALTH OF THE HORSE AND THE RIDE

Your horse loves to run! And watering your arena is essential to protect their legs from hard impacts while galloping. So it's important to keep your arena soft for your horse's safety. The greenPRO Arena Irrigator is purpose-built to make watering as easy and hands-off as possible, so you can spend more time riding.

TIME-SAVING AUTOMATIC SPEED CONTROL

Its integrated variable speed control 'set and forget' technology with automatic shut off system, enables the owner the freedom to attend other jobs without having to constantly monitor this process.

COMPACT AND VERSATILE USE

It's light and easy to use with, so anyone from a teenager to a twilighter can operate and move it. It's small, so it requires little storage space. And it also works just as effectively to water your paddocks.

GET THE JOB DONE WITH LESS WATER

Since no water is wasted in driving the hose reel, the irrigator can operate on as little as 20psi. So you can water the same area with less water than other irrigators.

Easy Arena Irrigation With Less Water And Attention Needed

1

OPERATES on very low water pressure, as low as 20psi

2

KEEPS arena nicely cushioned whilst providing traction, allowing your horse to perform at its best

3

PROVIDES excellent dust suppression

4

BENEFITS the health of the horse & the rider

5

SIMPLE to use hose system with variable speed hose retraction

6

AVAILABLE in 50m, 60m and 100m to suit your arena design
