

# ATV STEAMER

The only solution to **eradicating weeds organically**

## **The greenPRO ATV Steamer is the chemical-free solution to controlling weeds**

Specifically designed for organic farms, parks and gardens. Steam is the only chemical-free method for controlling weeds around public areas such as playgrounds, urban streetscapes, sports grounds, schools and in particular around waterways.

No more pulling weeds by hand or risking the integrity of your grounds. It can be used in any weather, without chemical run off or potential harm to surrounding areas.

The unit is compact and easily towed behind an ATV or ride-on mower. Featuring greenPRO's innovative design and Quik Spray's unique remote-controlled reel retraction, all powered by a 20 Watt solar panel.

The only environmentally-friendly solution for the removal of weeds in chemically sensitive areas. It's safe to use around livestock, crops, waterways, people and natural ecosystems. The greenPRO ATV Steamer is fast acting and highly effective for maintaining urban environments, free of chemicals. The greenPRO range is driven by innovation and a passion for sustainable environments.
