WHERE THE GRASS IS GREENER

greenPRO.com.au

Disc, plough, fertilise, seed, cover & roll all in one pass.

The greenPRO GP1200 Seeder saves you 6x the time, 6x the money, and 6x the labour by performing 6 separate jobs all at once, or independently, while overseeding and enriching your pasture.

The Seeder is lightweight and compact in size, making it easy to tow behind your farm vehicle. It can reach places that traditional seeders can't get to.

Ideal for vineyards and orchards

You can plant mid-row crops due to the compact size.

Marine-grade SS Seeder boxes

Maximum corrosion resistance to fertiliser and coated seeds.

Seeder metering reverse auger brush system

Easily adjustable for a variety of seeds and seed blends.

Cuttings discs open the surface

No tilling the soil.

Compact and manoeuvrable

Versatile and agile to move around trees and up against fence lines.

Saves you time

You can seed and fertilise at the same time.

Increase moisture retention

For plant growth by aerating soil with discs before rain.

Drags to cover the cut soil.

Roller ensures seeds are in contact with soil + closes the cut.
