QUALITY • PERFORMANCE • RELIABILITY • SERVICE

OVER 35 YEARS MARKETING LEADERS

WEED SPRAYING IS TOUGH. SO, WE REVOLUTIONISED THE WAY AUSTRALIANS SPRAY.

Quik Spray® is a premium manufacturer of heavy-duty herbicide application units. We are the most popular vegetation management control system used for Class 1 noxious weed infestations in Australia.

IN THE BEGINNING

Weed spraying contractors became tired and frustrated managing long lengths of hose, in rough terrain and difficult conditions. The sheer amount of wasted time, energy and damage to equipment while spraying noxious weeds was taking its toll. So, we invented a spray system to solve this problem.

THE SOLUTION

A remote-controlled retractable hose reel spraying system designed for heavy use in some of the harshest conditions on the planet. In the mid-1980's the first prototypes were built and after rigorous testing in the field, were released into the market. We have been manufacturing the world's first remote-controlled retractable hose reel system since 1988.

Over three decades, our range has been refined to suit many different types of applications and vehicles and can be custom designed for the end user. This has resulted in our reputation as the No.1 hose reel spraying system on the market today.

12VS REEL

12 VOLT

QR100 REEL

KEY FEATURES

ROBUST FRAMEWORK
Powder-coated, welded framework

RADIO REMOTE TECHNOLOGY
For fast & easy hose retraction

MANUAL OVERRIDE
Ensures no issues with rewind

SUPA-SLIP® HOSE
Up to 150m of kink resistant hose for tangle free operation

FITS YOUR CURRENT SYSTEM
Ideal for upgrading from a manual reel
Easy mounting with 2 bolt-down points

KEY FEATURES

HANDY BRAKE SYSTEM
Prevents overrun on reel

RADIO REMOTE TECHNOLOGY
For fast & easy hose retraction

FITS YOUR CURRENT SYSTEM
Ideal for upgrading from a manual reel

SUPA-SLIP® HOSE
Choice of 50m or 100m of kink resistant hose for tangle free operation

ROBUST 12V CLUTCH DRIVEN REEL
Motor can handle up to 60kg force against the retraction

UTV300/400

SINGLE OR TWIN REEL AVAILABLE
With up to 200m of Supa-Slip® Hose per reel

SPRAY TRAILER

Mount your Quik Spray on our tough, reinforced trailer. Complete with a tough galvanised chassis suited to rough off-road terrain, our trailer has a heavy-duty, construction coupled with the full-sized system of your choice. The 9TBE and 9TDE are popular options. Keep your vehicle tray free by towing your spray unit behind your vehicle.

With the capacity to accommodate up to a 2000L tank, the flat-bed trailer is spacious enough to add an additional storage locker for tools or drums.

Our trailers are suited to a variety of functions which include;

- Fire Fighting
- Weed Spraying
- Incident Command
- Heavy Duty Tandem and Tipper for Transportation
- Drill Rig Trailers
- Specialised Trailer
- Site Cleaning and Watering
- Food Preparation

KEY FEATURES

UV STABILISED TANK
Up to 2,000L available

CHOOSE YOUR SPRAY SYSTEM
The twin reel units are a popular option

MANUAL/ELECTRONIC BRAKING SYSTEM
Low centre of gravity for extra stability

HEAVY-DUTY CHASSIS
Ideal for off-road terrain

MULTI-PURPOSE FLATBED TRAILER
Storage options available

DUAL AXLE AVAILABLE

FTB LOCKER SYSTEM

CUSTOMISED TO SUIT YOUR NEEDS!

- Ladder Racks
- Kerb Side Boom
- Warning Lights and Warning Boards
- Increased Storage
- Chemical Batching Systems

KEY FEATURES

SAFE & USER FRIENDLY
Safe working platform, kerb side controls and accessibility are all key features of the Quik Spray Locker System, engineered in a user friendly, safety conscious design

EACH UNIT IS MADE TO ORDER
Choose from 300L to 500L tank sizes

STORAGE LOCKERS
With ventilation and easy-access

MANAGE WORK TASKS SAFELY & EFFICIENTLY
With everything stowed safely, including PPE gear, chemicals and road signage, all your gear is stored within easy access to increase productivity

RENOWNED FOR OUR TOUGH HOSE REWIND ACTION
Our reel retraction is strong enough to assist you up steep, hilly terrain if required

SUPA-SLIP® HOSE
Up to 200m per reel

POWERED BY

HONDA MOTORS

There isn't a better name for small engines than Honda. That is why we've partnered with Honda for over 30 years to match our machines with the best motors in the business. The Honda motors pack a punch and are designed to work hard from day one, so we've made sure it's the right Honda engine for each Quik Spray® model. We use genuine parts only.

BERTOLINI PUMPS

High quality pumps are essential for our systems, so we chose the best. 20 years of partnership with Bertolini Pumps has allowed us to use some of the highest quality pumps on the market. This guarantees optimum performance from your spray unit – the first time, every time.

SUPA SLIP® HOSE

Quik Spray Supa-Slip® hose is a high-grade Nylon, which is a polyamide bio plastic derived from vegetable oil, offering advanced performance and strength, as opposed to lower grade Nylons commonly used. The Nylon 11 hose is UV, chemical resistant and highly resistant to abrasion. The light-weight Supa-Slip® hose, used only on Quik Spray® systems, allows the hose to glide easily around trees, rocks and posts without it catching or kinking. Burst pressure rated to 1000 psi BP. Suited to operating at higher pressures, Supa-Slip® hose is less likely to kink or stretch giving it a longer life cycle.

RADIO REMOTE TECHNOLOGY

Our Quik Spray® units are radio controlled by a hand-held transmitter. Our advanced radio technology gives you superior, independent radio range, without interference between operators. Comes with a 5-year full comprehensive warranty on the RCM module (radio transmitters and radio control box).

HEAVY-DUTY COMPONENTS

When it comes to quality, we don't cut corners. Our equipment is all Australian made, right here in Coolum Beach, QLD. The framework is designed to withstand harsh treatment for heavy-duty spraying applications in the roughest, hottest, driest locations on earth. The heavy-duty pressed steel reels have rounded edges for a bullet-proof and operator-friendly design.

YOUR QUIK SPRAY JUST GOT SMARTER!

Time to spray smarter, Australia's leading hose reel manufacturer now brings you Australia's leading Spray Tracking system that automates chemical and location reporting for weed and pest control operations as well as keeping your team safe.

WHY USE SPRAY TEKNIX

- Saves you time and money
- Ensures your compliance records are accurate
- Automates GPS and Spray Volume information
- Works anywhere in the world
- Flow Sensors
- Quik Mount for your Quik Spray unit
- Unlimited apps and reporting users
- Free Data Integration Scope

CUSTOMER TESTIMONIALS

Over a Decade of Reliability: Our 600L Twin Spray Quik Spray is the Best Investment We Ever Made!

We have been using our twin spray 600 litre Quik Spray for over a decade, best investment we ever made, these set the standard for all commercial grade spray units, not cheap but they last and last under some very tough conditions and every time we need backup and replacement parts these guys ship them out virtually the same day or find us an alternative solution. Wish all Aussie companies had the service ethic these guys do, love our Quik Spray and love a decade of dealing with decent people, thanks guys.

– GRAHAM PARK
FACEBOOK REVIEW

The unit handles it all with ease.

We have had our unit for 7 years in our contracting business and can't fault it.

We cover all areas from flat country to river banks to mountain ranges and everything in between, chasing mainly lantana, cockspur to wild tobacco bush ect. The unit handles it all with ease. The first unit has done approx. 6000 hours and hasn't missed a beat. This prompted us to purchase a second unit 12 months ago to further our business.

– MATT & KAT MORGAN
KM SPRAY CONTRACTORS, NSW

It's very handy in steep country.

We can now cover half the country again by being able to roll it up so quickly, and it's very handy in steeper country. Gone are the days of hose reels with a manual handle on them – it's so much faster and easier. Sid Frend, Member – Kings Plains Landcare Group

The Kings Plains Landcare Group were able to obtain the Quik Spray unit a number of years ago and it has seen regular use! To have Quik Spray continue to support Landcare Groups in the way of offering repair kits for their units has been fantastic and very much appreciated. A big thumbs up to Quik Spray!" Anya Salmon – Landcare Coordinator at Gwymac, Inverell

REAL ENGINEERING

Quik Spray® provides turnkey spray solutions and equipment to suit your spraying needs.

AUSTRALIA'S NUMBER ONE MANUFACTURER AND SUPPLIER OF CUSTOM SPRAY SOLUTIONS.

CUSTOM IS OUR STANDARD

We learnt very early in our journey that our customers have very specific needs, always want more and we can't say no! Custom is our standard because we are your manufacturer. Our longevity and success have stemmed from our ability to be an extension of you, the customer.

We ensure that you have input and direction from the very first design meeting to the first in build inspection and before your creation leaves our factory. Our goal is to exceed your expectations, whether it's a standard slip-on sprayer to a fully integrated custom vehicle build. We call on years of knowledge and understanding of ADR and legislation to give you the system you need, along with the confidence that it will meet all the guidelines required.

TRUSTED INSIGHT

When you buy a Quik Spray you are also buying 36 years of experience. In that time, we have designed, adapted, redesigned, and got creative with our customers to deliver the most dependable spraying systems on the market. We work with some of the World's biggest companies to help.

provide you with technical understanding to ensure your build best suits your needs.

We have had the pleasure of working in an enormous variety

of vehicle related fields, from spraying, emergency services, industrial and defence, across a huge section of Australia's harshest environment direct with the end user.

This has given us a lot of valuable "real world" engineering knowledge that we would love to share with you to ensure your project is compliant and fit for purpose from the day you take delivery.

INNOVATORS, NOT IMITATORS

"We are the inventor of the remote-control retractable hose reel and the pioneers in developing products for the unique industries we serve."

ONGOING COLLABORATION

A specialised build team takes specialised care to ensure the life cycle of your project is met without added expense. We also take the time to induct your operators and provide the tools to maintain your equipment to ensure maximum performance.

If in the rare event of issues, you can feel confident that we will also be there to fix it fast! You deal directly with us, so there is someone who can deal with the issue, not a middleman or interim dealer. Any works can be done with us or numerous factory trained partners around the country.

This is the reason why many of our original builds are still in the field today and regularly outlast the vehicles they are fitted too.

AWARD WINNING AUSTRALIA MADE & OWNED BUSINESS

Quik Spray is a fully owned and operated Australian business, with true “in house” manufacturing capabilities at our head office of Coolum Beach, QLD, as well as our service centre in VIC. This means that when you buy from us, you are helping to invest in keeping Australian workers busy building unique, labour saving and environmentally beneficial equipment. We are humbled and proud to win multiple awards in our fields for manufacturing, innovation, export, safety and more. From Design, Fabrication and Assembly we are right here working together to deliver a truly Australian Made and owned product.

INNOVATION THROUGH ENGINEERING

DUST SUPPRESSION TRAILER

Quik Spray was recently given the task of designing two trailers for the purpose of dust suppression to be supplied to a Queensland local council. This unit needs to provide superior spraying ability, dust suppression and in cab control for the dust suppression system. Most importantly it must comply with all statutory legislation and Queensland Transport regulations.

The suppression spray is divided in to two sides, allowing either single side suppression or full coverage, which can be controlled remotely from the cab or manually. The Quik Corp Fire Engineering RFR-1 Manual Fire Hose Reel has been added for suppression and spraying in hard-to-reach places and also allowing the trailer to be used as a firefighting unit if required.

LIGHT STORM TRAILER

The Light Storm Trailer was designed with councils and fire agencies in mind as an in the field command centre. There are endless options when designing one of these units based on the specific needs of the customer. With the ability to set the system up in the field and be self-sufficient for long periods of time, these units are extremely valuable not only in emergency situations but where the operators need to be in the field for extended periods. This unit doesn't have a "standard" build, the inclusions are based on each individual customer requirements.

MULTI-PURPOSE HEAVY SPRAY UNIT

This vehicle was designed for a council in NSW that required a custom-built multi-use spray truck that could be operated by a single user where required. The council required a unit that would be equipped to do roadside spraying, spraying of ovals, open areas and capable of performing spot spraying where needed. We also needed to incorporate in-cabin controls to reduce the operators' need to exit the cabin whilst travelling on their spray jobs. This results in less fatigue for the operator and increased productivity!

HOT WATER PRESSURE TRAILER

The high performance trailer mounted hot water pressure washer system is perfect for chemical free cleaning. This unit has a minimum working pressure of 3,600psi and a steam cycle up to 120 degrees Celsius. With reinforced remote controlled reels and a Mosmatic stainless steel surface scrubber, there isn't much that this unit can't remove. Engineered with user safety in mind the unit is mounted to a tandem axle trailer with plenty of storage for PPE, signage and tools.

GRAFFITI REMOVAL SLIP ON UNIT

Moreton Bay regional council reached out to us for help with their next project. Having used Quik Spray units over the years the council knew we could offer them a robust product they could use for the purpose of removing graffiti in their area. The Moreton Bay regional council removes over 1 million graffiti tags per year. The council have ordered three of these purpose-built slip-on units to add to their fleet.

SAFETY CELL

Our award-winning safety cell design allows the operator to be safely secured within the cell to perform roadside spraying whilst the vehicle is in motion. The safety cell has features such as cameras within the cell so the driver of the vehicle can monitor the operator, emergency stop/start and pressure gauges to monitor the system whilst in use. There was a lot of work that went into this design taking into account for side impact protection and roll over protection. The system also has a retractable side boom to spray over the top of roadside barriers.
